

Visual QA — Features Request 07-30

Dashboard Simple view · Detailed cleanup · Roomy fix · CSAT /5 · Routing accuracy · Override reasons · External flag

v3.0.84-preview · deployed & visually verified · test cycle 2026-07-31

Tester: _____ Date: _____

Hard-refresh (Ctrl/Cmd-Shift-R) before testing. Every item below was implemented, deployed to production, and visually inspected in a live browser running this exact build (screenshots included; taken on a data-seeded verification environment).

What changed — all 9 items

#	Reported	Shipped
1	Roomy view titles clumped in the corner; too roomy	Header labels (Ticket · Assignee · Status · Due · Updated) now sit exactly over their columns (same grid as the rows); the title block is tightened
2	Could not find an External-chip ticket	The feature was off — trusted domains are now seeded (bgcengineering.ca) for every workspace. Live example: #235423 “New Hire: Tavleen Kaur” from notifications@app.bamboohr.com
S7	Correction feedback loop (team voted Want)	After reassigning an AI-routed ticket, a one-click “Why the override?” prompt (Wrong skill / Load balancing / Availability / Other) records a structured reason that feeds the assignment AI
S2	Routing-accuracy metric (team voted Want)	Analytics → Automation Ops: Routing accuracy stat (% of auto-assignments that stuck ≥7 days) + weekly trend chart — deterministic, from assignment episodes
3	Team-Safe table columns misaligned	All numeric columns right-align under non-wrapping titles, with tabular numerals
4	“Assigned by” column is too much	Column removed; the detail lives inside the expanded row (“Assigned by: name (n) · ...”) and the card drilldown
5	CSAT count read as a score (“2” looked like 2/4)	The cell now shows the average out of 5 (FreshService /4 × 1.25), colored by band; hover shows the raw /4 scale + response count; sorting uses the average
6/7	Sort by load; give the first column a title	Default order = highest load → lowest , ties alphabetical; the header now reads Agent Name
8/9	Simpler, less-cryptic toggleable views (mockups provided)	New Detailed / Simple toggle (persisted) for Compact <i>and</i> Cards: plain numbers on white, full-word headers (Picked up themselves · Sent by the app · Sent by a coordinator · Resolved · Rejected · CSAT score), calm captions under names — and the availability colors (WFH, vacation, holidays) are kept , exactly as requested

Emily Lin Steady week	Mon 27	Tue 28	Wed 29	Thu 30	Fri 31	Sat 1	Sun 2	4	2	0	2	2	0
Kareena Dutt Steady week	Mon 27	Tue 28	Wed 29	Thu 30	Fri 31	Sat 1	Sun 2	3	1	0	2	1	0
Benjamin Rabel Steady week	Mon 27	Tue 28	Wed 29	Thu 30	Fri 31	Sat 1	Sun 2	2	1	0	1	0	0
Dominic Bautista Dom off (Approved by KF) OFF	Mon 27	Tue 28	Wed 29	Thu 30	Fri 31	Sat 1	Sun 2	2	1	0	1	0	0
Alison Norton Steady week	Mon 27	Tue 28	Wed 29	Thu 30	Fri 31	Sat 1	Sun 2	0	0	0	0	0	0
Iris Caneso	Mon 27	Tue 28	Wed 29	Thu 30	Fri 31	Sat 1	Sun 2	0	0	0	0	0	0

Simple style, Compact — plain numbers on white, calm captions (“Steady week”; the leave caption + OFF badge preserved), load-sorted 6→5→4→3→2→2→0 with alphabetical ties, and no assigned-by column.

38 TOTAL 168 OPEN 33 PENDING 14 CLOSED 15 SELF Self-Pick 39%

Team (17 active) Cards Compact Detailed Simple Hide Noise Demo Mode Expand All Search tickets...

AGENT NAME	THIS WEEK (MON–SUN)							TOTAL	SELF	APP	ASGN	DONE	REJ
Mounika Mamidi	3	2	2	2	0	0	0	9	3	0	6	4	0
Tyler San Filippo	2	2	2	1	0	0	0	7	3	0	4	3	0
Polly Valkenborg	2	2	1	1	0	0	0	6	2	0	4	2	0
Brendan Navoa	2	1	1	1	0	0	0	5	2	0	3	2	0

Detailed style — the familiar rich look retained; new **AGENT NAME** header, **Detailed | Simple** toggle beside Cards/Compact, load-descending order (9→7→6→5), assigned-by column gone.

Simple headers close-up — “Agent Name” and “Tickets each day” replace the unlabeled / cryptic titles; the style toggle sits in the toolbar.

QA checks

- Dashboard order & header:** rows run highest→lowest Total (ties A–Z); the first column says **Agent Name**.
Result: ☐ **Pass** ☐ **Fail** — Notes: _____
- Detailed/Simple toggle:** the choice persists after refresh; Simple shows full-word headers + plain numbers in both Compact and Cards; WFH/vacation/holiday colors remain in both styles. Result: ☐ **Pass** ☐ **Fail** — Notes: _____
- CSAT:** the cell shows e.g. **4.4** (Simple: “4.4 / 5”); hover reveals “FreshService raw X/4 · N responses”; an agent with 2 responses no longer reads as “2/4”. Result: ☐ **Pass** ☐ **Fail** — Notes: _____
- Assigned-by:** no trailing people column; expanding a row shows the “Assigned by: ...” line above the ticket list (cards: inside View N tickets). Result: ☐ **Pass** ☐ **Fail** — Notes: _____
- Roomy view:** Tickets → Roomy — Assignee/Status/Due/Updated titles sit over their columns; nothing clumps in the corner. Result: ☐ **Pass** ☐ **Fail** — Notes: _____
- External chip:** open **#235423** (or any bamboohr/microsoft-sender ticket) — the amber **External** chip shows in the queue row, peek, and detail. Manage the list in Settings → Ticket Ops → Trusted domains. Result: ☐ **Pass** ☐ **Fail** — Notes: _____
- Override reason:** reassign an AI-assigned ticket — the “Why the override?” chips appear; one click → “Thanks — noted”. Result: ☐ **Pass** ☐ **Fail** — Notes: _____
- Routing accuracy:** Analytics → Automation Ops shows the % stat + weekly trend (em dash when no auto-assigns in range). Result: ☐ **Pass** ☐ **Fail** — Notes: _____
- Team-Safe table:** numbers sit flush under the Available Days / Assigned-per-Day / Leave / WFH titles. Result: ☐ **Pass** ☐ **Fail** — Notes: _____

Overall sign-off: ☐ **All pass** ☐ **Issues found** · Tester: _____
